

## Madani School Federation Summer School Analysis July 2021

The grant conditions of the Summer School funding require each academy to disclose a breakdown of the total spend of the income received. The below table shows the total income received for the summer 2021 Summer School, with a breakdown of the different categories for expenditure type:

### Madani Boys School

Total Income	Staff	Materials	Catering	Art, Sport and Wellbeing
£10,022	£6,077.50	£2,534.50	£250	£1,160

### Madani Girls School

Total Income	Staff	Materials	Catering	Art, Sport and Wellbeing
£6,350	£4,647.50	£1,050.50	£250	£402

Overall the Madani Schools Federation summer school was a huge success. The aim of our summer school programme was to deliver a 1-week summer school offering a blend of academic literacy education and enrichment activities. The students particularly enjoyed the following activities

- STEM club activities such as building load bearing bridges or self-propelled racing cars which incorporated literacy and numeracy within the sessions
- Archery and a range of sporting activities such as football, cricket and basketball
- Arts and crafts such as Islamic calligraphy or Henna hand art

- Board and computer games

Staff were pleasantly surprised by the number of students who opted to stay for the additional hour enrichment. The summer school has had a very positive effect on those that attended, by allowing the students to catch-up on social interaction lost during the pandemic and reinforcing the schools' **HEART** Principles.

### **Did the summer school meet the objectives?**

*To refresh, improve and develop student literacy and numeracy skills* – the student particularly enjoyed the STEM practical activities. They enjoyed the way the learning journey of the sessions built on their literacy and numeracy skills but in an engaging and interactive way.

*To increase student confidence, build a community with their peers, develop relationships and learn about their new environment* – the year 7 and 8 students who attended summer school have become more confident when engaging with other students. They have made friends with a wide range of students and these friendships have allowed the more vulnerable amongst them to have a support networks.

*To have a positive impact on student mental health and wellbeing* – a number of parents commented on the positive effect that attending the summer school had on their children and felt that they were excited about coming back in September.

*To start positive relationships with the most vulnerable families* – due to the communication that happened prior and during summer school these positive relationships have been established and parents will ask to speak to members of the summer school team about their child as they feel they already have positive relationships with them
